CENTRAL SAN PEDRO'S UNIQUE AND DISTINCT TREES

Noteworthy trees may represent iconic species, display a unique growth form, or stand out for their size at maturity. These trees provide significant benefits to the neighborhood council district and are listed below.

Indian Laurel Fig (*Ficus microcarpa*) Abundant Species

Indian laurel fig is a common street tree that reaches a spread of 40 ft. It has a oval or rounded shape, evergreen foliage, smooth grey bark. The fruits attract birds.

Carrotwood (*Cupaniopsis anacardioides*) Abundant Species

Carrotwood has a round shape and can reach a spread of 30 ft and a height of 40 ft. This drought and wind tolerant species is widely used as a street tree. The yellow to orange dry fruits, called capsules, attract birds.

Callery Pear (*Pyrus calleryana*) Abundant Species

Callery pear is known for its showy, fragrant flowers in the winter or spring. In the fall, it has small fruits that attract birds and the foliage can turn vibrant shades of red. This species can reach a height and spread up to 50 ft.

Bottle Tree (*Brachychiton populneus*) Abundant Species

Bottle tree has a conical shape and can reach a spread of 30 ft and a height of 50 ft. It is a fast-growing species with evergreen foliage. Bottle tree is native to Australia and produces white flowers in the spring and summer.
