HOLLYWOOD UNITED'S UNIQUE AND DISTINCT TREES

Noteworthy trees may represent iconic species, display a unique growth form, or stand out for their size at maturity. These trees provide significant benefits to the neighborhood council district and are listed below.

PROPOLI87

Italian Cypress (*Cupressus sempervirens*) Abundant Species

Italian cypress is an evergreen species with a columnar growth pattern (narrow and upright). This species reaches a height of 70 ft and a width of 20 ft and is commonly planted as a hedge to buffer noise and pollution.

Downtowngal

Evergreen Pear (*Pyrus kawakamii*) Abundant Species

Evergreen pear can reach a height and spread of 30 ft. This species has evergreen foliage, dark brown furrowed bark, and showy white flowers. Evergreen pear is native to Taiwan and China.

Indian Laurel Fig (*Ficus microcarpa*) Abundant Species

Indian laurel fig is a common street tree that reaches a spread of 40 ft. It has an oval or rounded shape, evergreen foliage, and smooth grey bark. The fruits attract birds.

DmitryGG

Jacaranda (*Jacaranda mimosifolia*) Abundant Species

Jacaranda is known for its showy, fragrant flowers. Jacaranda blooms in the early summer and sometimes again in the fall. This species reaches a spread of 30 ft and attracts birds.
